

**Decoflame Technical Information** 

# **ELLIPSE CEILING™**

With its elegant, feminine body shape, the Ellipse™ Ceiling is an impressive focal point in any interior.

It owes its curvy shape to more than 400 manual bends on each of the four metal sheets which construct the body of the Ellipse™ Ceiling. Organically shaped, hardened glass shields protect the lively dancing flames from air draughts.

The Ellipse Ceiling <sup>TM</sup> is equipped with a tube, which can be adapted in length to cater for any ceiling height and angle. With a hidden rotation mechanism, the Ellips Ceiling <sup>TM</sup> can be freely rotated by 360 degrees, which allows a view of the fire from any location in the room.

# STANDARD FINISH

## **TECHNICAL INFORMATION**

2,4 L
Up to 7 hours (depending on flame intensity)
2,0 kW/h
80 kg (Incl. standard tube 1500mm)
